

Thou shalt not sort thy papers!

The Xambox is the 1st integrated solution managing hard-copy documents. Spending hours clearing up cluttered spaces with paper is now over. The Xambox appliance arranges, files, stores and locates any of your documents even if you haven't already sorted them!

Keywords for automatic indexation

OCR, Index Scanner with ADF 20 pages / min, Search engine Fuzzy and complex queries Client-server or stand alone PC, Linux

Knowledge Management Business Intelligence, Content Management Systems, ISO Quality Assurance, Customer Relationship Management

Perfect for Professionals,, Lawyers, Doctors, Banks and S.M.E.

Integrated into an ERP or stand alone Remote backup

Fast ROI, save time, save money, auto sorting, vertical filing

Everything goes through the Xambox !

Invoices, credit card receipts, quotations, reports, notifications to attend, checks, ID's, business cards, news clippings

THE PIONNER OF VERTICAL SORTING

- Stack any paper document in any order in the Xambox and press the button. The Xambox will feed and scan them, and it will analyze the characters to store them both digitally and physically. Then, to locate a document, simply enter a keyword (content word, title, date...) and the Xambox will display the plain text and the PDF version of the document. It will also indicate where the hard copy is exactly located: "Your invoice is located in tray #2, 7th page past the green divider." Should you need the hard copy, just pick it up in the Xambox tray! When you are done, simply replace it on the top of the stack! There is absolutely no need to file!

STAND-ALONE PRODUCT OR ERP COMPATIBLE

As a stand-alone product, the Xambox provides :

- A search engine for paper documents, An accurate, speedy and practical alternative to traditional filing and sorting, A backup for original paper records, The elimination of hand searching, sorting and cross-referencing.

Integrated into a broader solution (KM, BI, QA, CRM, CMS, HR...), the Xambox also empowers :

- Full paper management within the integrating software, An easy connection with any content management solution, A multi-user and multi-Xambox architecture.
