**Xamance to Show the Power of “Chaotic Filing” With Xambox
at Wine Tasting Event In Denver**

Company Providing Sneak-Peek of Hi-Tech Filing System Prior to U. S. Launch

WHO: Xamance and Wines Off Wynkoop

WHAT: Etienne Leger, COO of Xamance will be offering a first-look at the company's new product, Xambox during a wine tasting event for Denver business owners, prior to the official launch of the system at CES 2009. Xambox is today's answer to the time consuming, traditional paper filing system.

WHERE: Wines Off Wynkoop
1610 16th Street
Denver, CO 80202

WHEN: Wednesday, October 16 at 5:00 p.m. MDT

DETAILS: Xamance's Xambox is based on “Chaotic Filing,” a novel solution for physical filing of documents by allowing documents to be relocated instantly without ever having filed them. With the technologies available today, the idea of chaos is enabling companies to be more efficient. For instance, many business people have their email messages all in one folder, where they conduct a key word search to find the information they require. Xamance has taken this approach and applied it to paper documents.

Local CEOs and IT executives will be on-hand to preview the new technology. A wine tasting of local wines, hosted by Wines Off Wynkoop, will be available to all attendees.
