Everything goes through the Xambox Professional: Invoices, receipts, quotations, reports, contracts, checks, legal size papers, business cards, news clippings...

A quick and complete processing method for all of your documents!

The Xambox Professional provides executives and managers, free-lancers and professionals, a paper document management solution combining the best technologies in both hardware and software.

The Xambox Professional includes a compact scanner wrapped in a unique design. The software intelligence provides many advantages such as a search engine for paper documents, which is as easy and powerful to use as a web search engine, and a user-friendly complete interface ensuring a quick usability. The Xambox Professional ensures original document conservation regardless of the format!

### How does it work?

Stack your paper documents in any order in the Xambox Professional and press the button. The Xambox will scan them, analyze their content, store the digital data and archive the original papers in a box.

Later on, you can find a document by doing a simple keyword search (using content word, title, date...). The Xambox will display the digital copy of your document in a PDF format. It will also indicate where the hard copy is exactly located:

*"Your invoice is located in box #2, 7<sup>th</sup> page past the green divider!"*

Should you need the hard copy? Just pick it up from the Xambox box! When you are done, simply replace it on top of the stack.

### Optimized data processing

- Paper format from business card size to legal
- Automatic color detection and duplex scanning
- Automatic character recognition (OCR) – English and French dictionaries
- Full text indexing of paper documents
- Automatic digital copy creation in PDF format
- Automatic document renaming

### Powerful and intuitive searches

- Full text search on key words
- Advanced search: Booleans, wild cards, fuzzy search...
- Ability to add Meta data to any document: comments, reminders...
- Creation of virtual folders (smart folders)
- Quick email forwarding
- Printing copies without accessing the original paper
- Secure backup of your documents database (optional)

### Easy access to original papers

- Archiving and optimum storage conditions in durable boxes
- Storage capacity: up to 250 pages per box
- Hard copies separated via bar-coded dividers for easy manual searches
- Graphic and written indication of the location of the original document
- Ability to follow up document's history
- Borrowing and returning feature; original paper can be returned to the top of the stack
- Ability to permanently remove a document from the stack while keeping a digital copy
